CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38(1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - 3.1 take all reasonable steps to prevent such abuse;
 - 3.2 reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - 3.3 cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

DESCRIPTION: INSTALLATION OF PALISADE FENCE**Specifications as follow:**

Contractor must provide and install a hot dip galvanised palisade fence at erf 7952 Rosedale. Contractor must allow for welded construction and minimal use of nuts and bolts to secure panels to all fixing posts.

All measurements must be confirmed by all contractors for pricing purposes. Running meters required for this project is 175 running meters of palisade fencing, which include a 6m wide sliding gate and 2 X 1m swing gates. See attached plan.

1. Thickness of pales must be 2.2mm.
2. Width of pales must be 50mm and spacing between pales must be 150mm centre to centre, allowing for a 100mm void. No bolts will be used to secure pales to the L-shaped angle brace, pales must be welded securely in place.
3. Height of pales must be 2.1m high.
4. Slotted angle braces must be 40 X 40 X 3mm L-shape.
5. Support posts of 76 X 76 X 1.6mm X 2.6m. Posts must be buried 500mm deep into the ground with a concrete mixture ratio of 1:3:5. Posts must stand a minimum of three (3) days weight free, to allow concrete to harden, prior to final fitment of the pre-manufactured panels. Contractor must note that due to the sloping nature of the site, the side runs will require longer posts to obtain the 2.1m height and these side runs should be stepped accordingly to follow the slope of the site.
6. Contractor must allow for 3 locking points per gate (6m Sliding gate included) and padlocks for each must be provided by the contractor.

7. The existing fences must be demolished and rubble must be carted away to the approved municipal dumping site. The appointed contractor must liaise with George Municipality and surrounding properties to complete this task.
8. 2.1m High Sliding gate must be installed, the style of the gate must match the palisade fence. The track must be fitted into the concrete and allow for 3 locking points per gate and padlocks for each point must be provided by the contractor.
9. Safety cage must consist of palisade fencing and two (2) x 1m self closing pedestrian gates, safety cage must be no less than 1m in width and 3m in length.

Local Labour

The appointed contractor must make use of labour from the ward and labour intensive methods as far as possible.

Building Rubble

Building rubble must be transported from the site to the approved municipal dumping site.

Once the required work has been performed, the site must be clean and pristine, prior to handing it back to George Municipality.

Contractor must note that all work is subject to a 3 month retention period and that 10% of the project amount will be held back for that period; it will only be paid when the defects that may occur within the 3 months have been repaired, inspected and signed off.
